- Abdelnour, R.** See Michel, B.  
**Adamowski, K.** See Draper, D. W.  
**Adams, P. F.** See Beaulieu, D.  
**Adams, P. F.** See Nixon, D.  
**Allen, D. E. and Rainer, J. H.** Vibration criteria for long-span floors, 165.  
**Ayers, H. D.** See Chisholm, P. S.  
**Badawy, H.** See Sargious, M.  
**Bakht, B. and Holland, D. A.** A manual method for the elastic analysis of wide cantilever slabs of linearly varying thickness, 523.  
**Barrett, J. D.** See Foschi, R. O.  
**Bateyman, L. A.** The Nelson River—an energy source, 437.  
**Beaulieu, D., Perlynn, M., Dunbar, A., Adams, P. F., and Kelker, D.** The effects of column out-of-plumbs on the stability of core-braced buildings, 417.  
**Bergmann, R.** See Tso, W. K.  
**Brun, P.** See Picard, A.  
**Cameron, N.** See Morrall, J. F.  
**Chen, W. F.** See Ross, D. A.  
**Chisholm, P. S., Ayers, H. D., Dickinson, W. T., and Macnab, I. D.** Effects of altering streambed material size on a specific measure of biological diversity, 563.  
**Constable, T. W., Kouwen, N., and Solomon, S. I.** A square grid model for assessing the effect of alternative land uses on water quality, 209.  
**Cowley, J. E.** Quantitative application of ice climate data to winter navigation studies, 229.  
**Curran, J. H. and Wright, P. M.** Toward automated elastic design of skeletal structures using computer graphics, 279.  
**Delarue, R.** See Lemieux, P. F.  
**Dickinson, W. T.** See Chisholm, P. S.  
**Draper, D. W. and Adamowski, K.** Application of linear programming optimization to a northern Ontario hydro power system, 20.  
**Dunbar, A.** See Beaulieu, D.  
**El-Ghazzi, M. N., Robinson, H., and Elkholby, I. A. S.** Longitudinal shear capacity of the slabs of composite beams, 514.  
**Elkholby, I. A. S.** See El-Ghazzi, M. N.  
**Emery, J. J.** See Nair, G. P.  
**Emery, J. J. and Thompson, C. D.** Seismic design considerations for gravity retaining structures, 248.  
**Ferahian, R. H.** Dynamic evaluation of overturning moment reduction factor used in static seismic loading: Discussion, 476.  
**Firth, M. and Williams, W. M.** Notch toughness as a criterion of material quality, 294.  
**Foschi, R. O. and Barrett, J. D.** Longitudinal shear strength of Douglas-fir, 198.  
**Frederking, R. M. W. and Gold, L. W.** The bearing capacity of ice covers under static loads, 288.  
**Frye, M. J. and Morris, G. A.** Analysis of flexibly connected steel frames: Reply, 352.  
**Ghosh, R. S.** Proportioning of concrete mixes incorporating fly ash, 68.  
**Giroux, Y.-M.** See Picard, A.  
**Gold, L. W.** See Frederking, R. M. W.  
**Guru, B. P.** See Tso, W. K.  
**Harmathy, T. Z.** Creep deflection of metal beams in transient heating processes, with particular reference to fire, 219.  
**Heidebrecht, A. C.** Dynamic evaluation of overturning moment reduction factor used in static seismic loading: Reply, 477.  
**Holland, A. D.** See Bakht, B.  
**Huizer, A.** An evaluation of compression prism, shear bond, and bending bond control tests for clay brick masonry, 402.  
**Kelker, D.** See Beaulieu, D.  
**Knoll, F.** Structural design concepts for the Canadian National Tower, Toronto, Canada: Discussion, 163.

- Knoll, F.** Commentary on the basic philosophy and recent development of safety margins, 409.  
**Kobelak, A.** See Thompson, G. A.  
**Kouwen, N.** See Constable, T. W.  
**Kung, T.** See Penel, J.  
**Langan, B. W. and Ward, M. A.** A laboratory investigation for potential durability of ready-mixed concrete retempered for air content and workability, 570.  
**Lemieux, P. F., Zech, Y., and Delarue, R.** Design of a stormwater sewer by nonlinear programming—1, 83.  
**Logan, L. A.** A computer-aided snowmelt model for augmenting winter streamflow simulation in a southern Ontario drainage basin, 531.  
**MacGregor, J. G.** Safety and limit states design for reinforced concrete, 484.  
**Macnab, I. D.** See Chisholm, P. S.  
**Maitland, S. T.** See Nisbet, E. G.  
**Malhotra, V.** Is high-alumina cement a satisfactory structural material? Discussion, 474.  
**Marche, C. et Robillard, L.** Etude comparative de deux modèles mathématiques dans l'analyse de rejets thermiques à Gentilly, 119.  
**Martinez y Rodriguez, J. B. and Russell, S. O.** Sequencing techniques for project screening, 90.  
**McCorquodale, J. A.** See Nasser, M. S.  
**Michel, B. et Abdelnour, R.** Stabilité hydro-mécanique d'un couvert de glace encore solide, 1.  
**Morrall, J. F., Cameron, N., and Werner, A.** Determining the capacity of the Canadian trans-mountain highway system, 355.  
**Morris, G. A.** See Frye, M. J.  
**Murray, D. G.** See Smith, C. D.  
**Muzik, I.** Determination of design hydrographs on small catchments by the state variable model, 239.  
**Nair, G. P. and Emery, J. J.** Spatial variations in seismic motions, 32.  
**Nasser, M. S. and McCorquodale, J. A.** Analysis of wave action in permeable structures, 98.  
**Neill, C. R.** Dynamic ice forces on piers and piles, 305.  
**Neill, C. R.** Erratum: Dynamic ice forces on piers and piles. An assessment of design guidelines in the light of recent research, 478.  
**Neville, A. M.** Is high-alumina cement a satisfactory structural material? Reply, 476.  
**Neville, A. M.** Erratum: Is high-alumina cement a satisfactory structural material?, 478.  
**Nisbet, E. G. and Maitland, S. T.** Mass concrete sections and the maturity concept, 47.  
**Nixon, D. and Adams, P. F.** Analysis of flexibly connected steel frames: Discussion, 349.  
**Ouellet, Y.** Etude hydraulique d'un type particulier d'ouvrage d'évacuation de crues, 265.  
**Ouellet, Y.** Etude comparative de différents types d'ouvrages pour lutter contre l'agitation dans une rade portuaire, 379.  
**Palmer, M. D.** Measurements of coastal dispersion in Ontario lakes, 156.  
**Penel, J. and Kung, T.** Peak runoff simulation in a subarctic region, 555.  
**Penzien, J.** Predicting the performance of structures in regions of high seismicity, 138.  
**Perlynn, M.** See Beaulieu, D.  
**Picard, A. and Giroux, Y.-M.** Moment connections between wide flange beams and square tubular columns, 174.  
**Picard, A., Giroux, Y.-M., and Brun, P.** Analysis of flexibly connected steel frames: Discussion, 350.  
**Pipes, A.** See Quick, M. C.  
**Quick, M. C. and Pipes, A.** A combined snowmelt and rainfall runoff model, 449.  
**Rainer, J. H.** See Allen, D. E.  
**Robillard, L.** See Marche, C.  
**Robinson, H.** See El-Ghazzi, M. N.  
**Ross, D. A. and Chen, W. F.** Design criteria for steel I columns under axial and biaxial bending, 466.  
**Russell, S. O.** See Martinez y Rodriguez, J. B.  
**Salinas, J. J.** See Sargious, M. A.  
**Sargious, M. A. and Salinas, J. J.** Selection of optimal policies for airport projects, 428.  
**Sargious, M. and Badawy, H.** Mathematical modelling for optimizing bridge costs, 461.  
**Sharma, S. C.** See Soliman, A. H.  
**Simmonds, S. H.** Structural design by computer: Book Review, 578.  
**Smith, C. D. and Murray, D. G.** Erratum: Cobble lined drop structures, 353.  
**Soliman, A. H. and Sharma, S. C.** Impact of land use changes on transportation networks, 372.  
**Solomon, S. I.** See Constable, T. W.  
**Tadros, M. K.** Design charts for reinforced concrete L-sections, 479.  
**Thompson, C. D.** See Emery, J. J.  
**Thompson, G. A. and Kobelak, A.** The Highway 8 review: A systems analysis and corridor evaluation study, 58.  
**Tso, W. K. and Bergmann, R.** Dynamic analysis of an unsymmetrical high rise building, 107.

- Tso, W. K. and Guru, B. P.** A statistical study on artificially generated earthquake records, 11.  
**Vinnakota, S.** Influence of imperfections on the maximum strength of biaxially bent columns, 186.  
**Waller, D. H.** Problems and possibilities in urban drainage, 392.  
**Ward, M. A.** *See* Langan, B. W.  
**Ward, P. R. B.** Seasonal salinity changes in the Fraser River Estuary, 342.  
**Weaver, D. S.** On flow induced vibrations in hydraulic structures and their alleviation, 126.  
**Werner, A.** *See* Morrall, J. F.  
**Williams, W. M.** *See* Firth, M.  
**Wright, P. M.** *See* Curran, J. H.  
**Zech, Y.** *See* Lemieux, P. F.

## SEPTEMBER/SEPTEMBRE

## ARTICLES:

<b>John F. Morrall, Neville Cameron, and Al Werner</b>	Determining the capacity of the Canadian trans-mountain highway system	355
<b>Afifi H. Soliman and Satish C. Sharma</b>	Impact of land use changes on transportation networks	372
<b>Yvon Ouellet</b>	Etude comparative de différents types d'ouvrages pour lutter contre l'agitation dans une rade portuaire	379
<b>D. H. Waller</b>	Problems and possibilities in urban drainage	392
<b>A. Huizer</b>	An evaluation of compression prism, shear bond, and bending bond control tests for clay brick masonry	402
<b>Franz Knoll</b>	Commentary on the basic philosophy and recent development of safety margins	409
<b>Denis Beaulieu, Mike Perlynn, Alastair Dunbar, Peter F. Adams, and Douglas Kelker</b>	The effects of column out-of-plumbs on the stability of core-braced buildings	417
<b>Michel A. Sargious and J. J. Salinas</b>	Selection of optimal policies for airport projects	428
<b>L. A. Bateman</b>	The Nelson River—an energy source	437
<b>Michael C. Quick and Anthony Pipes</b>	A combined snowmelt and rainfall runoff model	449

## NOTES:

<b>Michel Sargious and Hammouda Badawy</b>	Mathematical modelling for optimizing bridge costs	461
<b>D. A. Ross and W. F. Chen</b>	Design criteria for steel I columns under axial and biaxial bending	466

## DISCUSSIONS:

<b>V. Malhotra</b>	Is high-alumina cement a satisfactory structural material?: Discussion	474
<b>A. M. Neville</b>	Is high-alumina cement a satisfactory structural material?: Reply	476
<b>R. H. Ferahian</b>	Dynamic evaluation of overturning moment reduction factor used in static seismic loading: Discussion	476
<b>A. C. Heidebrecht</b>	Dynamic evaluation of overturning moment reduction factor used in static seismic loading: Reply	477

## ERRATA:

<b>A. M. Neville</b>	Erratum: Is high-alumina cement a satisfactory structural material?	478
<b>Charles R. Neill</b>	Errata: Dynamic ice forces on piers and piles. An assessment of design guidelines in the light of recent research	478

## DECEMBER/DECEMBRE

## ARTICLES:

<b>Maher K. Tadros</b>	Design charts for reinforced concrete L-sections	479
<b>J. G. MacGregor</b>	Safety and limit states design for reinforced concrete	484
<b>M. N. El-Ghazzi, H. Robinson, and I. A. S. Elkholly</b>	Longitudinal shear capacity of the slabs of composite beams	514
<b>Baidar Bakht and D. A. Holland</b>	A manual method for the elastic analysis of wide cantilever slabs of linearly varying thickness	523
<b>L. A. Logan</b>	A computer-aided snowmelt model for augmenting winter streamflow simulation in a southern Ontario drainage basin	531

## NOTES:

<b>J. Penel and T. Kung</b>	Peak runoff simulation in a subarctic region	555
<b>P. S. Chisholm, H. D. Ayers, W. T. Dickinson, and I. D. Macnab</b>	Effects of altering streambed material size on a specific measure of biological diversity	563
<b>B. W. Langan and M. A. Ward</b>	A laboratory investigation for potential durability of ready-mixed concrete retempered for air content and workability	570

## BOOK REVIEW:

<b>S. H. Simmonds</b>	Structural design by computer	578
-----------------------	-------------------------------	-----
